

Revision Wed

Now assume the total area of Turkey is not given as a percentage of the area of the world but it is given as 783469 km². Revise your program accordingly to calculate the same things and get the same output!

Sample output might contain minor changes as highlighted in the example below:

Earth has 148941024 km2 dry land and 361130976 km2 water.

Turkey has 773283 km2 dry land and 10185 km2 water.

Turkey has 0.5191873798316305 percent of the Earth's dry land.

Turkey has 0.0028203063921052288 percent of the Earth's water.
